WORDPRESS HOSTING

SLEEP WELL AT NIGHT

OUT OF NOWHERE
info@outofnowhere.net
817.531.7400

The most important thing you can do to protect your website investment is to keep the site software (there's a lot of it) up to date. Old software slows down your site and puts your site at risk to hackers. Cheap hosting with big corporations works, but it does not work for you. Our hosting services do. We continuously monitor your site and update the software as soon as new versions are released. We protect you with a fire wall and scan your site daily for malicious software. And, we make redundant backups of your site to the cloud, to allow for the remediation of your site if it breaks or to save your site from a catastrophic loss. We even send you a report every month, so you rest easier knowing...

We are working on your site, even when you are not.

Host Your Site with SSL

We securely store and serve your site to the internet on world-class servers.

Reduce Risk with Continual Monitoring

As WordPress, your theme or plugins release new updates, we upgrade them on your site to keep it protected and running smoothly.

Protect Your Site from Hackers

We continuously scan your site for vulnerabilities and install a firewall to block nefarious intruders.

Personalized Recommendations

If your theme or plugins are abandoned by their developers, we reach out personally to notify you and suggest a replacement.

Redundant Backups to The Cloud

Your site and our web host servers are backed up daily to Amazon's premier S3 servers. Site-specific redundant backups are stored in a second location on the cloud for quick recovery.

Increased Speed and Performance

We host only websites we monitor, and which meet our strict guidelines regarding software and content loaded on the site. This ensures the server runs quickly and smoothly, and you will not be negatively affected by any other site on the server.

Monthly Website Care Reports

Every month we send you a report which outlines the software updates and security scans we performed on your site. You will see we are always working on your site, even when you are not.

[Peace of Mind for only \\$40/month](#)

Yes. I would like to sleep well at night by having Out of Nowhere host our site.
